## EDUCATION

### Rutgers, the State University of New Jersey

*Robotics PhD advised by Dr. Jingjin Yu*

Aug. 2019 – Present

Piscataway, USA

- IROS 2023 Finalist of Best RoboCup Paper Award.
- Related courses: Computer Vision, Machine Learning

### University of Science and Technology of China(USTC)

*Bachelor in Mathematics*

Aug. 2015 – Jun. 2019

Hefei, China

- Outstanding Graduates(2019)
- Outstanding Student Scholarship (2015-2016) (2017-2018)
- Gold Award of China Undergraduate Mathematical Contest in Modeling in Anhui Province(2017)(1/65 in USTC)
- Related courses: Computer Graphics

## WORK EXPERIENCE

### Advanced Robotics Intern

*Siemens Corporation*

May. 2022 – Sep. 2022

Berkeley, USA

- Conducted extensive literature research on object packing problems.
- Developed model-free approaches for efficiently packing irregularly-shaped objects.
- Created a prototype pick-and-pack system with a UR5 robot, integrating the proposed packing strategy and Siemens' advanced grasping technology.
- Created demonstration videos and experimental results of the packing strategy for potential customers to showcase its effectiveness and efficiency.

## RESEARCH EXPERIENCE

### Task and Motion Planning

*Research Assistant*

Mar. 2020 – Present

Algorithmic Robotics and Control Lab(ARCL), Rutgers University, USA

- Implemented various complete perception-planning-control pipelines utilizing different robotic arms.
- Developed efficient algorithms and analyzed structural characteristics with mathematical proofs for various manipulation scenarios.
- Applied deep learning models for perception and stability prediction of object placement.
- Performed extensive experimentation and demonstration utilizing various simulation platforms, including PyBullet, Issac Gym, Drake, and ROS+Gazebo.

### Multi-Robot Path Planning

*Research Intern*

Jul. 2018 – Sep. 2018

Algorithmic Robotics and Control Lab(ARCL), Rutgers University, USA

- Designed fast algorithms to solve multi-robot path planning problems with different objectives.
- Designed an efficient algorithm to solve the perimeter guarding problem.
- Proved some lemmas and theorems on the efficiency of the algorithms.

### Image Registration

*Research Assistant*

Sep. 2017 – Jun. 2019

Graphics&Geometric Computing Laboratory(GCL), USTC, China

- Developed a highly efficient non-rigid image registration algorithm that is able to handle noise and outliers effectively.
- Implemented the algorithm with C++ and employed OpenGL for visualization.

## SELECTED CERTIFICATES & AWARDS

---

**IROS 2023 Finalist of Best RoboCup Paper Award.**

*RoboCup Federation*

Oct 2023

Detroit, MI

**Gold Award of China Undergrad. Math. Contest in Modeling in Anhui Province (1/65 in USTC)**

*China Society for Industrial and Applied Mathematics*

2017

Hefei, China

**Reinforcement Learning Specialization.**

*University of Alberta, Alberta Machine Intelligence Institute*

July 2023

Coursera

**Outstanding Graduates(2019)**

*University of Science and Technology of China*

Jun. 2019

Hefei, China

**Outstanding Student Scholarship (2015-2016) (2017-2018)**

*University of Science and Technology of China*

2016, 2018

Hefei, China

## SKILLS

---

**Programming Languages** : Python, Matlab, C++

**Tools** : Git, ROS, PyBullet, Gazebo, OpenCV, PyTorch, Gurobi, Drake, Isaac Gym

## INVITED TALKS

---

**Fast High-Quality Tabletop Rearrangement in Bounded Workspace.**

*TRIPODS/DATA-INSPIRE Graduate Student Workshop*

March 2022

Virtual

**On Minimizing the Number of Running Buffers for Tabletop Rearrangement**

*TRIPODS (Transdisciplinary Research in Principles of Data Science) Seminar*

May 2021

Virtual
