EDUCATION

Rutgers, the State University of New Jersey

PhD, Robotics/Computer Science | Advisor: by Dr. Jingjin Yu

- IROS 2023 Finalist of Best RoboCup Paper Award. (Top 6% among accepted papers)

Aug. 2019 – Present

Piscataway, USA

University of Science and Technology of China (USTC)

Bachelor, Mathematics

Aug. 2015 – Jun. 2019

Hefei, China

WORK EXPERIENCE

Applied Scientist Co-op

Amazon Robotics

Feb. 2024 – Present

North Reading, USA

1. Participated in a project to train an imitation learning model for object grasping with closed-loop control, responsible for deciding on the object set and demonstrated behaviors for subsequent data collection based on the roll-out performance of trained policies.
2. Developed a simulation environment using Nvidia Isaac Sim for multi-step non-prehensile manipulation tasks, enabling effective demonstration collection and analysis of varying observation types and task descriptions (language prompts or images).
3. Fine-tuned transformer-based foundation models (generalist policies) for hardware-agnostic skill learning and multi-skill chaining.

Advanced Robotics Intern

Siemens Corporation

May. 2022 – Sep. 2022

Berkeley, USA

1. Designed and implemented a model-free online algorithm for the bin packing problem with irregularly shaped objects. The method consists of a depth-image preprocessing process and a gradient-based optimizer.
2. Built a prototype pick-and-pack system utilizing a UR5 robot and RealSense cameras, seamlessly integrating the proposed packing strategy with Siemens' FlexGrasp.
3. Created demonstration videos of the pick-n-pack system, which helped the team find potential customers.

RESEARCH EXPERIENCE

Robot Arm Manipulation Planning

Research Assistant Advised by Dr. Jingjin Yu

Algorithmic Robotics and Control Lab (ARCL), Rutgers University, USA

Mar. 2020 – Present

1. Designed and implemented perception-planning-control pipelines for multiple real-world robotic systems, utilizing UR5 robots in tabletop rearrangement settings and a Baxter Robot for shelf-based object retrieval scenarios.
2. Applied deep learning models for precise object segmentation, grasp pose generation, and prediction of object pose stability.
3. Designed and constructed simulation scenarios for shelf, tabletop, room environments using physics engines such as PyBullet, Isaac Gym, Drake, ROS+Gazebo, and Moveit.
4. Explored dual-arm motion planning through C-space decomposition on MIT Drake and GPU-accelerated parallel RRT-connect on Nvidia Isaac Gym.

Language-Guided Semantic Object Rearrangement

Research Assistant Advised by Dr. Jingjin Yu

Algorithmic Robotics and Control Lab (ARCL), Rutgers University, USA

Mar. 2023 – Sep. 2023

1. Explored language-guided manipulation planning strategies in collaboration with Dr. Abdeslam Boularias' team.
2. Developed a Monte-Carlo Tree Search based task planner that uses goal state conditions, interpreted by large language models from human language instructions, as input.

Image Registration

Research Assistant Advised by Dr. Juyong Zhang

Graphics & Geometric Computing Laboratory (GCL), USTC, China

Sep. 2017 – Jun. 2019

1. Developed a non-rigid image registration algorithm based on Iterative Closest Points and Quasi-Newton method adept at handling noise and outliers.
2. Implemented the algorithm in C++ and utilized OpenGL for enhanced visualization and thorough code testing.

Lab Toolkits Development, and Miscs

Research Assistant Advised by Dr. Jingjin Yu

Algorithmic Robotics and Control Lab (ARCL), Rutgers University, USA

Jul. 2018 – Present

1. Developed camera calibration software to precisely evaluate the perception accuracy of RealSense cameras.
2. Created a pose estimation dataset featuring synthesized desktop scenes from diverse camera angles, using Blender.

SELECTED CERTIFICATES & AWARDS

IROS 2023 Finalist of Best RoboCup Paper Award.	IROS, Oct 2023
Gold Award of China Undergrad. Math. Contest in Modeling in Anhui Province (1/65 in USTC)	2017
Reinforcement Learning Specialization.	Coursera, July 2023
Outstanding Graduates (2019)	USTC, Jun. 2019
Outstanding Student Scholarship (2015-2016) (2017-2018)	USTC, 2016, 2018

SKILLS

Programming Languages : Python, C++, Matlab

Tools : Git, ROS, Docker, PyBullet, Gazebo, OpenCV, PyTorch, Gurobi, Drake, Isaac Gym, Unreal Engine, Blender

INVITED TALKS

Fast High-Quality Tabletop Rearrangement in Bounded Workspace.	March 2022
<i>TRIPODS/DATA-INSPIRE Graduate Student Workshop</i>	Virtual
On Minimizing the Number of Running Buffers for Tabletop Rearrangement	May 2021
<i>TRIPODS (Transdisciplinary Research in Principles of Data Science) Seminar</i>	Virtual
